

Dear FCC, Please don't allow the National Association of Broadcasters to pass this NAB petition 04-160. It is a violation of Sattelite Radios rights to broadcast this information. Why else would the NAB want to stop something like this except that they are scared of what sattelite radio can do to their existing radio networks. Why have they not gone after weatherband radio for the same reasons?

I urge you to side with the sattelite radio companies and dont violate their rights to broadcast local content...

Sincerely,
Morris Lyles
Columbia SC
